PERSONAL PROFILE

A motivated second-year BSc (Hons) Computing student at Itahari International College with hands-on experience in Python, SQL, Power BI, and data visualization through independently delivered analytics projects. Skilled in exploratory data analysis, data cleaning, and business intelligence dashboard development, having analyzed datasets of 8,000–9,800+ records across retail, entertainment, and cybersecurity domains. Seeking a Data Analyst role or internship where I can apply my technical skills to generate meaningful insights and support data-informed decisions.

EDUCATION

BSc (Hons) Computing | Itahari International College, Nepal *2024 – Expected 2027*
+2 Level (Science) | Siddhartha Boarding School, Damak, Nepal *Completed 2024*

PROJECTS

Sales Analytics Dashboard | Python | SQL | Power BI *2026*

- Analyzed 9,800+ retail sales records to identify revenue trends, customer purchasing behavior, and regional performance
- Performed data cleaning and transformation using Python and SQL to ensure data accuracy and consistency
- Developed an interactive Power BI dashboard featuring KPIs, sales trends, customer insights, and product performance analysis
- Generated actionable business insights through data visualization and reporting, enabling data-informed decision making

Netflix Data Analysis | Python | Pandas | Matplotlib | Seaborn *2026*

- Conducted exploratory data analysis (EDA) on 8,797 Netflix titles using Python to uncover content distribution patterns
- Performed data cleaning, missing value handling, and feature engineering using Pandas and NumPy
- Created visualizations to analyze content growth trends, ratings distribution, genre popularity, and country-wise content production
- Extracted insights from entertainment data through statistical and visual analysis using Matplotlib and Seaborn

Network Traffic Analysis & Intrusion Detection | Python | Statistical Analysis *2026*

- Analyzed network traffic data to investigate patterns between normal and malicious traffic using Python
- Performed exploratory data analysis, correlation analysis, and hypothesis testing to identify statistically significant indicators
- Visualized traffic characteristics and attack distributions using statistical charts and boxplots
- Applied data analysis techniques to identify trends and support cybersecurity-related insights

SKILLS

Technical Skills

- Data Analysis & Visualization: Python (Pandas, NumPy, Matplotlib, Seaborn), Exploratory Data Analysis (EDA), Statistical Analysis
- Business Intelligence: Power BI (interactive dashboards, KPIs, data modelling)
- Data Management: SQL, data cleaning, transformation, and feature engineering
- Programming Languages: Python, Java, JavaScript (ES6+)
- Web & Frontend: React.js, HTML5, CSS3

Transferable Skills

- Analytical Thinking: demonstrated through data-driven academic projects and algorithmic problem solving
- Attention to Detail: applied consistently in code reviews, system testing, and structured data handling
- Fast Learner: independently studied React.js and data concepts outside formal curriculum and applied them in live projects
- Team Collaboration and Communication: engaged in group coursework and collaborative academic projects

ACHIEVEMENTS & ACTIVITIES

- Analyzed over 18,000+ data records across independent projects covering retail sales and streaming content datasets
- Built and delivered three data analysis projects independently — spanning EDA, visualization, dashboarding, and cybersecurity analytics
- Self-directed learner: developed proficiency in Power BI, Pandas, Seaborn, and SQL outside formal curriculum and applied them in real-world datasets
- Active GitHub contributor — maintaining documented project repositories demonstrating professional development practices
